Executive Summary

PVDP Sindh has come a long way in providing the necessary social and economic development services to the marginalized and ultra-poor communities of Sindh, Pakistan since its inception in 1997. The milestones proudly achieved include the Natural Resource Based Poverty Reduction Model (NRBPRM), time tested sustainable Primary Education Model, Livelihood Based Technical Skills Model, WASH and SHELTER models beside making the poor community aware on the social and economic issues and building their capacities to tackle them on self- help basis as much as possible.

Progress during the reporting period 2011-2012 include building livelihood base of about 700 marginalized households in Thar through Natural Resource Based Poverty Reduction Model (NRBPRM), provided access to clean drinking water to more than 16000 persons in Thar Desert through various projects, supported 2356 school children in Thatta, Gambat and Tharparkar to go schools on regular basis. Beside WASH, Vaccination as well as Mother and Child healthcare programs were carried out in Tharparkar, Thatta and Umerkot districts. Shelter project initiated in Thatta, Umerkot and Mirpurkhas districts helped more than 20,000 men, women and children in improving the quality of their lives after floods 2010 and 2011.

PVDP is a progressive organization and over the past three years it has substantially grown geographically as well as programmatically. The human and organizational capacities have been enhanced to take the future human development challenges in Sindh province of Pakistan.

PVDP sees itself become more efficient and effective in its work to deliver the expected outcomes of the human development challenges. For this purpose, it is looking forward to have a more vocal and effective governance and management structures, standards, policies and procedures in place from January 2013 and onward.

The organization is also looking forward to broaden its external support system in which it is planning on working with more humanitarian organizations to support more and more marginalized and deprived communities in Sindh province of Pakistan.

Najma Caleb
General Secretary
Board of Directors, PVDP.

1. Poverty reduction and food security

1.1 **Project Title:** Natural Resource Based Poverty Reduction Model (NRBPRM) **Supported By:** Pakistan Italian Debt for Development Swap Agreement (PIDSA)

Project Description:

The support of Pak Italian Debt for Development Swap Agreement (PIDSA) is helping PVDP Sindh to establish a sustainable source of livelihood for people of Thar Desert. The project is contributing to empower about 2000 women who are the prime beneficiaries of the project. 1250 of these women will directly benefit from adult literacy and handicraft skill development contributing to their livelihood. The project is helping 3,000 school children who often drop out of schools during drought times, will continue with their schooling as parents will have settled livelihood due to this project. This way the children's right to education will be restored.

The Model includes various environment friendly activities such as:

1. Khushhal Goth Markaz Committee (KGMC)
2. Rain Water Harvesting Tanks
3. Nadi Filter for clean drinking water
4. Fodder Trees
5. Fruit Trees
6. Small Flock Units (Provision of 2 she Goats/family)
7. Kitchen Gardening
8. Fuel Efficient Stove

Activities	Progress	Outcome
Monthly meeting of 50 Khushhal Goth Markaz Committees (KGMCs)	600	<ul style="list-style-type: none"> 50 KGMCs have developed their monitoring plan and taking part in project implementation. The members of 50 KGMCs maintain records of the project activities. Members of 50 KGMCs are following Term of Partnership (TOP) for project management. 80% of the members of 50 KGMCs learned good practices of other CCBs. Members of 50 KGMCs understand their role and responsibilities and show active participation to suggest effective development strategies. Members of 50 KGMCs involved in project evaluation. Government Organizations and Civil Society Organizations (CSOs) learn from successful activities of project through PVDP website and Quarterly Thardost Newsletter. 1050 women are enrolled in adult literacy centres (25 per village). 80% of the women in adult literacy centre can read and write their name and easily do simple calculations 2,200 beneficiary households are establishing sustainable source of livelihood through the project activities.
Formation of Adult literacy Centers for women	25	
Provision of 1,600 she goats 2 to each household	800 HHs	
Rainwater Harvesting Tanks	700	
Bio-sand Nadi Filter	700	
Kitchen Gardening	700	
Economy Stove	700	
Livestock management trainings	5	
Bio Sand Nadi Filter Making training	5	
Trainings on Making and use of Fuel Efficient stoves	5	
Drip supported Kitchen gardening trainings	5	
Natural Resource Management trainings for sustainable livelihood	5	
Training on Handicraft Skill Development	20	

1.2 Project Title: Drought mitigation
Supported By: Catholic Relief Service

Project Description:

With the support of Catholic Relief Service (CRS) Drought mitigation project is being implemented in Thar Desert aiming to mobilize the communities of Taluka Nagarparkar of District Tharparkar on watershed approaches to drought mitigation with active involvement of all stakeholders to resolve issues of water harvesting for drinking, small scale agriculture, livestock use and water shed management.

Progress:

Activity	Progress	Outcome
New Ponds	7	<ul style="list-style-type: none"> Water available for livestock Improved agriculture in selected villages due to availability of water and Range land Management. Contributing to safe environment through tree plantation The drought mitigation visible due to community having water source at their door step. Reduced Diseases in livestock due to vaccination and livestock management awareness. Improved health while people take Health and Hygiene measures. Developed linkage between community and government so that service delivery can be demanded by community from government. Fresh vegetable available for community through Kitchen garden. Drinking water secured through water tanks which can be used during drought times helping to reduce migration Contributing to improve the literacy level in Tharparkar district through enrollment of children in schools Beneficiaries get fresh vegetable at household level which is contributing to safe health.
Repair ponds	10

School Enrollment Boys /Girls	639	

1.3 **Project Title:** Income, Shelter, and Health Recovery for Overlooked Minority Flood Survivors in Thatta District

Supported by: Universal Unitarian Service Committee (UUSC)

Project Description:

This Project helps to reduce the poverty of the 200 minority families of District Thatta. These families were worse affected during floods 2010 and were left out from relief and recovery support. PVDP Sindh is working with them to improve/upgrade their life standard by providing livestock, shelters inputs and bio sand nadi water filters. Furthermore building their capacities by providing them community training and mobilizing them and making them aware of the importance of education and helping them to get their children enrolled in schools.

Activity	Number	Output
Distribution of Doors & Windows	1 door and 1 window per family	200 families supported
Distribution of live chicken	5 chicken per family	200 families supported
Installation of Nadi filters	One nadi-filter per family	200 families supported
Distribution of Sheep	Two sheep per family	200 families supported
Community trainings on Livestock Management and Marketing.	10	10 villages benefited
Enrollment of children in primary schools	117	83 boys and 34 girls were encouraged to be enrolled in schools.

Outcomes:

200 families are having sources of income generation.

117 Children are going to schools regularly.

2. Water and sanitation

2.1 Project Title: Building Capacity of 1000 vulnerable households in Thar Desert Sindh to Become Drought Resilient

Supported by: Christian Engineers in Development (CED) UK

Goal:

Help drought-vulnerable households to benefit from improved water based community assets and to develop them as water secured communities.

Objectives:

1. Drought-vulnerable women have enough water to meet domestic requirements and household kitchen gardening.
2. Drought vulnerable communities use linkages with government and other actors to improve their water resources.

Progress

Activities	Progress	Outcome
Construction of water storage/ tanks	300	<ul style="list-style-type: none"> Drought vulnerable households have improved access to sweet water for drinking. Reduced water borne diseases due to use of bio sand nadi filter.
Construction of Ponds (<i>Tarai</i>)	3	<ul style="list-style-type: none"> Women are engaged to learn handicraft skills to supplement their earnings in drought and normal times. Rainwater harvesting tanks help to have sweet water for drinking and avoiding drinking deep wells brackish water with its adverse health consequences.
New Dug Well	2	<ul style="list-style-type: none"> Water available near to villages for livestock. Drought vulnerable households decreased their vulnerability for water in dry months.
Rehabilitation of old wells	6	<ul style="list-style-type: none"> Drought vulnerable households improved environment by planting of trees in surroundings of ponds. Drought vulnerable households have improved availability of food by growing fresh vegetables.
Kitchen Gardening	100	<ul style="list-style-type: none"> Poor households saving money by growing vegetables at home. Drought vulnerable households consume preserved vegetables during drought season.
Tree plantation	5000	<ul style="list-style-type: none"> Members of KGMCs have increased knowledge of existing government schemes, eligibility criteria and how to access them; Increased mutual knowledge of relevant research/ technical institutions and communities active in innovative water harvesting work which can be later supported by local government.
Workshops/Trainings		
KGMC meetings with Government.	4	
KGMC member meetings	12	<ul style="list-style-type: none"> Men and women have capacity to manage their projects through Village Organization (VOs)/KGMCs/Citizen Communities Boards (CCBs).
Project Management	1	<ul style="list-style-type: none"> Women acquired capacity to manage their water resources.
Water Management	3	<ul style="list-style-type: none"> Women are producing vegetable for domestic use, thereby saving on buying vegetable which help them to meet other needs of food.
Kitchen Gardening	3	
Livestock Management	2	<ul style="list-style-type: none"> Community is empowered to demand their socio economic rights from the state.

2.2 Project Title: Community Led Total Sanitation (CLTS)

Supported by: Planning and Development Department (P&DD) Government of Sindh

Goal:

Primary Health Care Initiative at Community and School level through access to sweet drinking water and practice of community Led total Sanitation (CLTS) in 5 villages of District Tharparkar

Objectives:

- a) To support 250 poor households in getting accessibility of clean and safe sweet drinking water and sanitation facilities (CLTS) for improving their health through implementation of community physical infrastructure in 05 villages of District Tharparkar in one year.
- b) To build capacity of 7000 households and 20 School Teachers for real Practices of Rain Water Harvesting and Sanitation (CLTS and School Health & Hygiene Education (SHHE) to improve Health and Sanitation Standards.

Activities	Progress	Outcome
Construction of latrines	44	<ul style="list-style-type: none"> The capacity of the community enhanced with awareness about the importance of safe and clean sweet drinking water and the hazards of improper sanitation environment. The community practicing hygienic methods in their routine life (both in community & schools). Capacity building of community through trainings and mobilization sessions on Primary Health Care (CLTS). This also contributing to the sustainability of project. Capacity building of School Teachers and SMC Members through trainings and mobilization sessions such as School Health & Hygiene Education (SHHE Practices) also adds to the sustainability of project. Rain Water Harvesting Tanks, Bio Sand Water Filter, Pit Latrines handed over to community and KGMCs. Women and girls will feel secured and safe by using latrines close to their homes.
Construction of bio sand filter	44	
Construction of rain water harvesting tanks	44	
Bio sand filter maintenance trainings	4	
SSHE Trainings for 20 School Teacher and School Management Committee (SMCs)	2	
Community mobilization session on CLTS in 5 villages	10	

3. Coexistence through Interfaith Harmony for Peace

Project Name: Interfaith Harmony (CWS)

Goal: The program seeks to promote coexistence, mutual understanding and respect amongst various religious groups through engagements and dialogue on common values, human rights and democratic norms.

Objectives:

- Strengthen the capacity of religious leaders to resolve and prevent inter religious conflicts and promote interfaith community development.
- Support youth leaders from across different faiths, sects and ethnic backgrounds to launch interfaith dialogue and spread the message of tolerance within their community.
- Increase the understanding of government officials and other decision-makers on religious tolerance and encourage their leadership in policy dialogue on institutional reforms that can support peace and interfaith harmony.

Activities:

Activities	Progress	Outcome
Formation of Religious groups each group has 25 religious leaders	3	<ul style="list-style-type: none"> 125 local religious leaders trained on interfaith community development and conflict resolution Quarterly meetings of 125 religious leaders. Series of activities at community level to promote interfaith harmony.
Training of religious leaders	3	
Peace day celebration	1	
Cultural interfaith program	2	
Religious days celebration	2	
Public event/ Seminars	1	
Advocacy campaigns (Pamphlet on food security)	1	

4. Primary Health Care

4.1 Project Title: Strengthen immunization and healthcare delivery system in District Tharparkar and District Sanghar, Sindh.

Supported by: GAVI CSO Alliance

Project Description: PVDP has implemented project “Strengthen Immunization and Healthcare Delivery system” in District Tharparkar and Sanghar. The project supported health department in improving vaccination and reproductive health services in targeted areas through fulfilling the gaps between community and relevant stakeholders.

Activity	Number	Output
Awareness Sessions	124	3728 participants given health awareness
Trainings of Health Staff	6	129 Vaccinators and LHWs trained
Vaccination Campaigns	8	76,846 vaccination doses administered
Formation of Village Health Committees (VHCs)	110	Community of 110 villages are conducting regular meetings
Mother & Child week celebration	2	7349 children given deworming tablets, 42 special sessions arranged on Mother and Child healthcare (MCH).
Trainings of VHC members	7	172 VHC members trained

Outcomes:

1. Improved coverage of immunization of children and women.
2. Improved knowledge and participation of community in immunization.
3. Upward trend of antenatal checkups.

4.2 Project Title: Community Health Project Thatta

Supported by: Action Medeor

Project Objective: Contribute toward improvement of health of communities affected by flood 2010 in union council Gul Muhammad Baran, Tehsil Jati, of District Thatta through health education and other health interventions.

Progress:

Activity	Number	Output
Formation of Village Health Committees (VHCs).	51	Community of 51 villages is meeting regularly
Trainings of VHC members	22	357 VHC members
Awareness sessions with community	514	10,281 Participants benefited
Awareness session with school children	68	Children given knowledge regarding personal hygiene
Vaccination campaigns	11	20818 doses of vaccines administered.
Construction of basic village health centers (BVHCs)	6	287 patient treated

Outcome:

Increased knowledge of community regarding hygiene, vaccination, family planning
 Availability of basic healthcare facilities for 51 villages
 Increased coverage of routine immunization.

4.3 Project Title: Community Water Project**Supported by:** Action Medeor**Goal:**

To promote and upgrade the rain water harvesting techniques and practices in 5 villages of district Tharparkar and to contribute towards public health and water security of area.

Objectives:

- Prepare the water security plan in 5 villages of District Tharparkar.
- 75 Households comprising about 525 men, women and children have enough safe and sweet drinking water to maintain safe health.

Activities	Progress	Outcome
Village level survey	1 (5 villages)	KGMCs have the record of total population of villages. KGMCs have the record of available safe & sweet water sources in their villages. KGMCs have the record of required safe & sweet water for their villages. KGMCs have the plan for eradicating the water scarcity problem. 75 households of the 5 villages have twin rainwater harvesting tanks. 75 households of the 5 villages have Nadi filter. Population of 75 households comprising about 525 men, women and children have safe and sweet drinking water at their door steps. Women of 75 households are contributing to household income generation activities. <i>(Fetching water is the responsibility of women and every day woman spends three to four hours on this activity. When she will get water at her door step she will spend her saved time in handicrafts production for income generation. She will also have time to better look after her kids and livestock.</i>
Household survey	1 (5 Villages)	
Formation of KGMCs in 5 Villages	5	
Construction of rain water harvesting tanks.	75	
Provision of Bio Sand Nadi filters.	75	

4.4 Maternal and child healthcare (MCH)

MCH centre of PVDP is serving communities at Taluka Islamkot of District Tharparkar Sindh. The centre is established to address the problem of reproductive health facing women and infants. PVDP Sindh is working to provide access to healthcare and educate people on proper hygiene and basic health practices to reduce the risk of infant and maternal mortality. PVDP Sindh also trains the local Traditional Birth Attendants (TBAs) from the project villages to enhance their capacities for safe deliveries and care of new born babies. The TBAs are also trained to visit women in pregnancy to provide antenatal and post natal care. Recognizing that the participation of women is critical to development, PVDP Sindh is working to ensure that women are healthy and strong so that they can contribute toward a better quality of life for themselves and their children and families.

<u>Ultrasound</u>	37
<u>Laboratory</u>	192

5. Education

5.1 Project Title: Primary Education

Supported by: Kinderorthilfe (KNH) Germany

Objective

To support Children of marginalized households to receive quality education

Project Description:

PVDP is making efforts to improve the education in its working areas through education projects, advocacy and awareness campaigns. PVDP believes that education is a basic right of the children among other rights. PVDP Sindh is providing education to the children of

Tharparkar through its 10 primary schools in the remote areas of Nagarparkar in Thar Desert. More than 800 boys and girls who otherwise would be deprived of their basic right are receiving education.

5.2 Child Friendly Space (CFS)

1718 students are receiving informal education in 20 Child Friendly Space in Gambat, Khairpur district. Stationary has been provided regularly as per need of each CFS. It has been observed in the field that interest of the children is increasing towards getting education.

- Drawing pictures of the objects children like
- Colouring of drawings
- Exercises to recognize colours
- Singing poems and rhymes on hygiene and peace
- Learning personal and environmental hygiene practices
- Playing of games
- Sharing of good practices and learning from each other's

6. Institutional Development

6.1 BOARD of Governance

PVDP BOD met twice in reporting period and reviewed the performance of the overall management and discussed the policy matters, made vital decisions, approved future plans and reviewed the growth of the organization.

6.2 Capacity building

PVDP Sindh always gives due importance to the capacity building of its staff members. PVDP provides the opportunity to its staff to enhance their capabilities to deliver quality performance. Following staff members received trainings during the reporting period

7. PVDP Publications

PVDP Sindh brings out quarterly newsletter Thardost, posters for the advocacy on different messages to make readers (audience) aware of the issues in society particularly of PVDP working areas. PVDP quarterly Thardost Newsletter carries the information on quarterly progress of the running projects. PVDP also uploads all information on PVDP's website to facilitate web visitors to read and comment for improvement of community development work.

8. PVDP Sindh Emergency Response

Once again after flood 2010 PVDP Sindh has played a vital role by providing needed support to the community worse affected during 2011 floods. About 15000 households in flood affected districts namely Umerkot, Thatta, Sanghar Badin and Mirpurkhas were supported with food and non-food relief and rehabilitation.

PVDP Emergency Response to Flood 2011

District Thatta

Provided Food assistance to 2125 Flood affected households during flood emergency in District Thatta.

Early Recovery

• **Project Title**

“Improved access to sanitation facilities and increased awareness and practice of safe hygiene behavior for flood 2011 affected population of Sindh”.

Supported by: International Rescue Committee (IRC)

Project Description:

The project aims to improve the sanitation facilities and increase hygiene behavior and awareness in flood affected union council Araro Bhurgari and Samaro of Taluka Samaro, Umerkot of Sindh Province.

Activities	Progress	Outcome
76 Latrines Construction	76	<ul style="list-style-type: none"> • People using latrines for health & hygiene • Women and girls feel secured and safe by using latrines close to their homes.
Session on Health and hygiene	118	<ul style="list-style-type: none"> • Reduced diseases related to hygiene • People are practicing Health and hygiene.

9. **Cross Cutting Themes**

Along with organizational themes PVDP also undertakes to contribute in Human Rights especially child right, women right, community participation, Gender Equality, Environment Protection and Networking as cross cutting themes. In all its work, PVDP strives to maintain Quality and Transparency in its work and remains accountable for its actions towards community, staff, government, donors and other stakeholders.

9.1 **International Women day**

PVDP Sindh celebrated international Women's day on 10 of March 2011 with collaboration of Future In Our hands Pakistan FIOH-PAK and Rotary Club of Ratanabad to emphasize the vital role of women in society. More than 80 Women, Men, Children and senior citizens participated in the event. FIOH-PAK presented interactive theater on gender equality.

9.2 **Youth Development**

PVDP Sindh has organized 30 youth capacity building seminars and trainings on Leadership Skills, Disaster Risk Reduction, gender equality, raising issue of society through comics, Global climate change, Youth Media Training and Mobilization through Interactive Theater in collaboration with FIOH-PAK.

PVDP Partners in Development

The Participatory Village Development Programme is a PCP certified non profit non political organization, committed to empower the local poor and marginalized communities for reduction of poverty, social wellbeing and establishment of peace.
